I have a dream and my dream factory is filled with five wonderful machines.

The first machine is called Knowledge-Giver. It can connect to a person's brain and teach you all the knowledge and skills in a second.

The second machine is called Safety Car Producer. It can make cars that run super fast; but if two cars are about to crash, one car would jump over the other, so no one would get hurt.

The third machine is called the Incredible Vending Machine. It gives out food, water, games, friendship, and imaginations. All for FREE!!!

The fourth machine is called Super Robot Movie Star. The robot has black belts from Tae Kwon Doe, Karate and Martial Arts. Everybody loves the robot.

The fifth machine is called the Flying Magic Shied. If you are in danger, press a button and you will have a shield to protect you. If you press a second button, you can fly wherever you want.

Do you like my dream? If we work hard, all of our dreams will come true.
